PREFACE

Because the supply and use of energy involves aspects of so many different activities, energy statistics appear in a wide range of ABS collections and a correspondingly wide range of ABS publications.

This DIRECTORY OF ABS ENERGY STATISTICS is intended to assist those involved in discussions of energy matters to locate the information available in the ABS that may be of relevance to a particular topic.

INTRODUCTION

With the growing interest in energy matters over recent years, there has been a corresponding increase in requests for statistical data bearing on energy reserves, production, transformation, distribution and consumption. This Directory provides a comprehensive listing of ABS publications which contain energy related data.

Other organisations which produce statistics in this field include the Department of National Development and Energy (and the Bureau of Mineral Resources, Geology and Geophysics), the Joint Coal Board, the Australian Institute of Petroleum, and the Electricity Supply Association of Australia. State Government departments and instrumentalities also are important sources of energy data, particularly at the regional level, while a number of companies and other entities operating within the energy field also publish or make available a significant amount of energy information.

Suggestions for improvements to this Directory may be addressed to either Mr David Lengyel on Canberra (062) 525653 or Information Services units of ABS Offices around Australia.

HOW TO USE THIS DIRECTORY

This Directory is divided into three parts - A, B and C.

PART A lists various ABS publications and sources of data under broad energy topic headings, namely

- 1 EXPLORATION for energy commodities
- 2 PRODUCTION of primary energy commodities and TRANSFORMATION of these into secondary energy sources
- 3 FOREIGN TRADE in energy commodities
- 4 DEMAND for energy commodities
- 5 MANPOWER resources related to energy
- 6 PRICES of different energy commodities
- 7 PUBLIC AUTHORITY FINANCE (Commonwealth, State and local authorities) relevant to energy
- 8 RESEARCH AND DEVELOPMENT into energy
- 9 OTHER RELATED ASPECTS

PART B lists all relevant publications in ABS catalogue number order. Generally, the following details have been included for each publication:

- . ABS catalogue number and title of the publication
- . Frequency of issue
- . Where the issue is on a regular basis, the date the publication was first issued
- . Where the issue is on an irregular basis, the most recent date of publication
- . A brief summary of the relevant data contained in the publication. Only those activities/industries which form part of the energy sector are listed in this summary. Where statistics for detailed dissections of particular commodity types are provided in the publication, only the overall term has been used in the summary - eg, where data are provided separately for 20 different petroleum products, only the term "petroleum products" has been entered.
- . The name and telephone number of the person who may be queried about the publication.

PART C is a detailed energy commodity index to ABS publications listed in alphabetical order. It should be noted that this index and Part A contain no references to the "Year Book Australia" (ABS catalogue number 1301.0) or the "Pocket Year Book Australia" (ABS catalogue number 1302.0).
